Nijland Cycling

Toogether

NIJLAND

nijland.com

The Toogether is available with or without pedal assist and start-up aid.

Comfort on the go

A reliable, custom-made bike

The Toogether tricycle is perfect for those who want to cycle together. The driver sits on the left and can control the handlebars, gears, and assistance level. The passenger sits on the right and has a fixed handlebar but can also adjust the gears independently. For passengers with limited mobility or other challenges, we recommend having a caregiver take the steering.

No Step-Through
The Toogether is specially designed without a step-through, making it even easier to take a seat. This ensures maximum accessibility, especially for people with limited mobility or those who need extra stability. Without having to lift your leg, you can start every ride safely and comfortably.

Riding Together
The Toogether is designed for side-by-side cycling, offering a unique riding experience centered around social interaction. Whether it's a caregiver and client, a parent and child, or two friends, the Toogether enables active communication while on the move. This makes it not only a practical bike but also a social and connecting one.

Pedal Assist
The Toogether is available both with and without pedal assist. Electric support provides an extra boost, making cycling easier, helping you climb hills more effortlessly, and allowing you to ride longer distances. The Toogether E features a reliable front hub motor and a removable battery located next to the rear basket. The motor can be individually adjusted, with options for 3, 5, or 9 levels of assistance.

Custom Fitting
Do you have special requirements or need specific adaptations to cycle optimally? The Toogether can be fully customized and equipped with various accessories. You can also further personalize the bike by choosing your own color, among other options.

Technical Specifications

Toogether

High stability | No step-through | Side-by-side cycling
