Product Brochure

Nijland Cycling

Nando

NIJLAND

nijland.com

The Nando is available with a pedal-assist motor and walk-assist function.

Comfort on the go

A reliable, custom-made bike

The Nando Tandem is designed for rides with a rider and a passenger, allowing the rider at the rear to take control of the steering. This larger version of the Nindo is specially developed for older children or adults in the front position. The Nando features an innovative engageable and disengageable connection between the front and rear rider, allowing the front rider to shift gears independently. This makes the tandem highly versatile and suitable for a wide range of riding conditions.

Easy Access

The Nando is designed with an accessible step-through, making it easier for both younger and older riders to mount and dismount. This makes the bike suitable for a wide range of users, including people with limited mobility.

Adjustable for Different Riders

The Nando is designed to adapt to the needs of various riders. Whether accommodating taller or shorter users, the seat and handlebars can be easily and quickly adjusted to provide optimal comfort for both riders.

Electric Assist Motor

The Nando is available with or without an electric assist motor. Pedal assistance provides an extra boost, making cycling easier, allowing you to tackle hills more comfortably and cover longer distances. The Nando E is equipped with a reliable front-wheel motor and a removable battery located in the luggage basket. The motor can be personally adjusted to your preference, with options for 3, 5, or 9 levels of assistance.

Custom-Built Bike

Do you have special requirements or need specific modifications to ride optimally? The Nando can be fully customized and equipped with various accessories. You can also personalize the bike further by choosing your own color.
